REVISION HISTORY

Revision	Date	Status / Reason	
0	10/4/2023	In respond to Rohani email which includes TOR & BQ	
1	13/4/2023	To exclude Tidal Monitoring work and to include USV as an option	

1. COMMERCIAL PROPOSAL - (Revision 1)

a Data Processing and Reporting i) SBES bathymetry survey: Data processing and reduction ii) Issue a survey report the latest 14 days after demobilize Total - (Tax excluded) Total - (Tax excluded) RM 65,100 Option B) SBES by using a USV 1 Pre Survey Activities i) Preparatory work including provision of visiting the Government Survey Department for procurement of necessary and relevent information & application for survey permit from Marine Department and/or other authority ii) Mobilisation & Demobilisation of survey team, equipment and USV to site IS RM 30,500 iii) Tide gauge installation at the vicinity of the survey area and will be left during the survey 2 Field Data Collection and Surveying i) Bathymetry survey by using Single Beam Echo Sounder (SBES) with main sounding profile of 25m line interval 3 Data Processing and Reporting i) SBES bathymetry survey: Data processing and reduction IS RM 19,000 ii) Issue a survey report the latest 14 days after demobilize IS RM 2,500		o. co. 12 (1101191011 2)			
i) Preparatory work including provision of visiting the Government Survey Department for procurement of necessary and relevent information & application for survey permit from Marine Department and/or other authority ii) Mobilisation & Demobilisation of survey team, equipment and survey craft LS RM 2,500 survey 2 Field Data Collection and Surveying i) Bathymetry survey by using Single Beam Echo Sounder (SBES) with main sounding LS RM 16,600 profile of 25m line interval 3 Data Processing and Reporting i) SBES bathymetry survey: Data processing and reduction LS RM 2,500 Total - (Tax excluded) RM 65,100 Option B) SBES by using a USV 1 Pre Survey Activities i) Preparatory work including provision of visiting the Government Survey Department for procurement of necessary and relevent information & application for survey permit from Marine Department and/or other authority ii) Mobilisation & Demobilisation of survey team, equipment and USV to site LS RM 30,500 survey 2 Field Data Collection and Surveying i) Bathymetry survey by using Single Beam Echo Sounder (SBES) with main sounding LS RM 2,500 profile of 25m line interval 3 Data Processing and Reporting i) SBES bathymetry survey: Data processing and reduction LS RM 19,000 ii) Issue a survey report the latest 14 days after demobilize LS RM 2,500 profile of 25m line interval	Option A) Normal S	BES Survey			
procurement of necessary and relevent information & application for survey permit from Marine Department and/or other authority ii) Mobilisation & Demobilisation of survey team, equipment and survey craft LS RM 22,500 iii) Tide gauge installation at the vicinity of the survey area and will be left during the survey 2 Field Data Collection and Surveying i) Bathymetry survey by using Single Beam Echo Sounder (SBES) with main sounding LS RM 16,600 profile of 25m line interval 3 Data Processing and Reporting i) SBES bathymetry survey: Data processing and reduction ii) Issue a survey report the latest 14 days after demobilize Total - (Tax excluded) 7 Pre Survey Activities i) Preparatory work including provision of visiting the Government Survey Department for procurement of necessary and relevent information & application for survey permit from Marine Department and/or other authority ii) Mobilisation & Demobilisation of survey team, equipment and USV to site 1 SRM 30,500 iii) Tide gauge installation at the vicinity of the survey area and will be left during the Survey 2 Field Data Collection and Surveying i) Bathymetry survey by using Single Beam Echo Sounder (SBES) with main sounding LS RM 4,500 survey 3 Data Processing and Reporting i) SBES bathymetry survey: Data processing and reduction LS RM 19,000 ii) Issue a survey report the latest 14 days after demobilize LS RM 19,000 ii) Issue a survey report the latest 14 days after demobilize LS RM 2,500	1 Pre Surve	ey Activities			
from Marine Department and/or other authority ii) Mobilisation & Demobilisation of survey team, equipment and survey craft LS RM 22,500 iii) Tide gauge installation at the vicinity of the survey area and will be left during the survey 2 Field Data Collection and Surveying i) Bathymetry survey by using Single Beam Echo Sounder (SBES) with main sounding profile of 25m line interval 3 Data Processing and Reporting i) SBES bathymetry survey: Data processing and reduction ii) Issue a survey report the latest 14 days after demobilize Total - (Tax excluded) Pre Survey Activities i) Preparatory work including provision of visiting the Government Survey Department for procurement of necessary and relevent information & application for survey permit from Marine Department and/or other authority ii) Mobilisation & Demobilisation of survey team, equipment and USV to site US RM 30,500 iii) Tide gauge installation at the vicinity of the survey area and will be left during the LS RM 4,500 survey 2 Field Data Collection and Surveying i) Bathymetry survey by using Single Beam Echo Sounder (SBES) with main sounding profile of 25m line interval 3 Data Processing and Reporting i) SBES bathymetry survey: Data processing and reduction LS RM 19,000 ii) Issue a survey report the latest 14 days after demobilize LS RM 19,000 ii) Issue a survey report the latest 14 days after demobilize LS RM 2,500			-	- 1	ncl. below
ii) Mobilisation & Demobilisation of survey team, equipment and survey craft iii) Tide gauge installation at the vicinity of the survey area and will be left during the LS RM 4,500 survey 2 Field Data Collection and Surveying i) Bathymetry survey by using Single Beam Echo Sounder (SBES) with main sounding LS RM 16,600 profile of 25m line interval 3 Data Processing and Reporting i) SBES bathymetry survey: Data processing and reduction ii) Issue a survey report the latest 14 days after demobilize Total - (Tax excluded) RM 65,100 Option B) SBES by using a USV 1 Pre Survey Activities i) Preparatory work including provision of visiting the Government Survey Department for procurement of necessary and relevent information & application for survey permit from Marine Department and/or other authority ii) Mobilisation & Demobilisation of survey team, equipment and USV to site LS RM 30,500 survey 2 Field Data Collection and Survey team, equipment and USV to site LS RM 4,500 survey 2 Field Data Collection and Surveying i) Bathymetry survey by using Single Beam Echo Sounder (SBES) with main sounding LS RM 20,600 profile of 25m line interval 3 Data Processing and Reporting i) SBES bathymetry survey: Data processing and reduction ii) Issue a survey report the latest 14 days after demobilize LS RM 19,000 ii) Issue a survey report the latest 14 days after demobilize					
iii) Tide gauge installation at the vicinity of the survey area and will be left during the survey 2 Field Data Collection and Surveying i) Bathymetry survey by using Single Beam Echo Sounder (SBES) with main sounding profile of 25m line interval 3 Data Processing and Reporting i) SBES bathymetry survey: Data processing and reduction ii) Issue a survey report the latest 14 days after demobilize Total - (Tax excluded) RM 65,100 Option B) SBES by using a USV 1 Pre Survey Activities i) Preparatory work including provision of visiting the Government Survey Department for procurement of necessary and relevent information & application for survey permit from Marine Department and/or other authority ii) Mobilisation & Demobilisation of survey team, equipment and USV to site iii) Tide gauge installation at the vicinity of the survey area and will be left during the survey 2 Field Data Collection and Surveying i) Bathymetry survey by using Single Beam Echo Sounder (SBES) with main sounding profile of 25m line interval 3 Data Processing and Reporting i) SBES bathymetry survey: Data processing and reduction ii) Issue a survey report the latest 14 days after demobilize LS RM 19,000 ii) Issue a survey report the latest 14 days after demobilize		·			
2 Field Data Collection and Surveying i) Bathymetry survey by using Single Beam Echo Sounder (SBES) with main sounding profile of 25m line interval 3 Data Processing and Reporting i) SBES bathymetry survey: Data processing and reduction ii) Issue a survey report the latest 14 days after demobilize Total - (Tax excluded) Total - (Tax excluded) RM 65,100 Option B) SBES by using a USV 1 Pre Survey Activities i) Preparatory work including provision of visiting the Government Survey Department for procurement of necessary and relevent information & application for survey permit from Marine Department and/or other authority ii) Mobilisation & Demobilisation of survey team, equipment and USV to site iii) Tide gauge installation at the vicinity of the survey area and will be left during the survey 2 Field Data Collection and Surveying i) Bathymetry survey by using Single Beam Echo Sounder (SBES) with main sounding profile of 25m line interval 3 Data Processing and Reporting i) SBES bathymetry survey: Data processing and reduction ii) Issue a survey report the latest 14 days after demobilize LS RM 19,000 ii) Issue a survey report the latest 14 days after demobilize LS RM 2,500					
i) Bathymetry survey by using Single Beam Echo Sounder (SBES) with main sounding profile of 25m line interval 3 Data Processing and Reporting i) SBES bathymetry survey: Data processing and reduction ii) Issue a survey report the latest 14 days after demobilize Total - (Tax excluded) Total - (Tax excluded) RM 65,100 Option B) SBES by using a USV 1 Pre Survey Activities i) Preparatory work including provision of visiting the Government Survey Department for procurement of necessary and relevent information & application for survey permit from Marine Department and/or other authority ii) Mobilisation & Demobilisation of survey team, equipment and USV to site iii) Tide gauge installation at the vicinity of the survey area and will be left during the survey 2 Field Data Collection and Surveying i) Bathymetry survey by using Single Beam Echo Sounder (SBES) with main sounding profile of 25m line interval 3 Data Processing and Reporting i) SBES bathymetry survey: Data processing and reduction ii) Issue a survey report the latest 14 days after demobilize LS RM 19,000		ge installation at the vicinity of the survey area and will be left during the	LS	RM	4,500
ay Data Processing and Reporting i) SBES bathymetry survey: Data processing and reduction ii) Issue a survey report the latest 14 days after demobilize Total - (Tax excluded) Total - (Tax excluded) RM 65,100 Option B) SBES by using a USV 1 Pre Survey Activities i) Preparatory work including provision of visiting the Government Survey Department for procurement of necessary and relevent information & application for survey permit from Marine Department and/or other authority ii) Mobilisation & Demobilisation of survey team, equipment and USV to site iii) Tide gauge installation at the vicinity of the survey area and will be left during the survey 2 Field Data Collection and Surveying i) Bathymetry survey by using Single Beam Echo Sounder (SBES) with main sounding LS RM 20,600 profile of 25m line interval 3 Data Processing and Reporting i) SBES bathymetry survey: Data processing and reduction LS RM 19,000 ii) Issue a survey report the latest 14 days after demobilize LS RM 2,500	2 Field Dat	a Collection and Surveying			
3 Data Processing and Reporting i) SBES bathymetry survey: Data processing and reduction ii) Issue a survey report the latest 14 days after demobilize Total - (Tax excluded) RM 65,100 Option B) SBES by using a USV 1 Pre Survey Activities i) Preparatory work including provision of visiting the Government Survey Department for procurement of necessary and relevent information & application for survey permit from Marine Department and/or other authority ii) Mobilisation & Demobilisation of survey team, equipment and USV to site LS RM 30,500 iii) Tide gauge installation at the vicinity of the survey area and will be left during the LS RM 4,500 survey 2 Field Data Collection and Surveying i) Bathymetry survey by using Single Beam Echo Sounder (SBES) with main sounding LS RM 20,600 profile of 25m line interval 3 Data Processing and Reporting i) SBES bathymetry survey: Data processing and reduction LS RM 19,000 ii) Issue a survey report the latest 14 days after demobilize LS RM 2,500	i) Bathyme	try survey by using Single Beam Echo Sounder (SBES) with main sounding	LS	RM	16,600
i) SBES bathymetry survey: Data processing and reduction ii) Issue a survey report the latest 14 days after demobilize Total - (Tax excluded) Total - (Tax excluded) RM 65,100 Option B) SBES by using a USV 1 Pre Survey Activities i) Preparatory work including provision of visiting the Government Survey Department for procurement of necessary and relevent information & application for survey permit from Marine Department and/or other authority ii) Mobilisation & Demobilisation of survey team, equipment and USV to site IS RM 30,500 iii) Tide gauge installation at the vicinity of the survey area and will be left during the survey 2 Field Data Collection and Surveying i) Bathymetry survey by using Single Beam Echo Sounder (SBES) with main sounding profile of 25m line interval 3 Data Processing and Reporting i) SBES bathymetry survey: Data processing and reduction IS RM 19,000 ii) Issue a survey report the latest 14 days after demobilize LS RM 2,500	profile of	25m line interval			
Total - (Tax excluded) Total - (Tax excluded) RM 65,100 Option B) SBES by using a USV 1 Pre Survey Activities i) Preparatory work including provision of visiting the Government Survey Department for procurement of necessary and relevent information & application for survey permit from Marine Department and/or other authority ii) Mobilisation & Demobilisation of survey team, equipment and USV to site LS RM 30,500 iii) Tide gauge installation at the vicinity of the survey area and will be left during the LS RM 4,500 survey 2 Field Data Collection and Surveying i) Bathymetry survey by using Single Beam Echo Sounder (SBES) with main sounding LS RM 20,600 profile of 25m line interval 3 Data Processing and Reporting i) SBES bathymetry survey: Data processing and reduction LS RM 19,000 ii) Issue a survey report the latest 14 days after demobilize LS RM 2,500					
Option B) SBES by using a USV 1 Pre Survey Activities i) Preparatory work including provision of visiting the Government Survey Department for procurement of necessary and relevent information & application for survey permit from Marine Department and/or other authority ii) Mobilisation & Demobilisation of survey team, equipment and USV to site LS RM 30,500 iii) Tide gauge installation at the vicinity of the survey area and will be left during the LS RM 4,500 survey 2 Field Data Collection and Surveying i) Bathymetry survey by using Single Beam Echo Sounder (SBES) with main sounding LS RM 20,600 profile of 25m line interval 3 Data Processing and Reporting i) SBES bathymetry survey: Data processing and reduction LS RM 19,000 ii) Issue a survey report the latest 14 days after demobilize LS RM 2,500					
Option B) SBES by using a USV 1 Pre Survey Activities i) Preparatory work including provision of visiting the Government Survey Department for procurement of necessary and relevent information & application for survey permit from Marine Department and/or other authority ii) Mobilisation & Demobilisation of survey team, equipment and USV to site LS RM 30,500 iii) Tide gauge installation at the vicinity of the survey area and will be left during the survey 2 Field Data Collection and Surveying i) Bathymetry survey by using Single Beam Echo Sounder (SBES) with main sounding profile of 25m line interval 3 Data Processing and Reporting i) SBES bathymetry survey: Data processing and reduction LS RM 19,000 ii) Issue a survey report the latest 14 days after demobilize LS RM 2,500	ii) Issue a su	rvey report the latest 14 days after demobilize	LS	RM	2,500
1 Pre Survey Activities i) Preparatory work including provision of visiting the Government Survey Department for procurement of necessary and relevent information & application for survey permit from Marine Department and/or other authority ii) Mobilisation & Demobilisation of survey team, equipment and USV to site LS RM 30,500 iii) Tide gauge installation at the vicinity of the survey area and will be left during the survey 2 Field Data Collection and Surveying i) Bathymetry survey by using Single Beam Echo Sounder (SBES) with main sounding profile of 25m line interval 3 Data Processing and Reporting i) SBES bathymetry survey: Data processing and reduction LS RM 19,000 ii) Issue a survey report the latest 14 days after demobilize LS RM 2,500		Total - (Tax excluded)		RM	65,100
i) Preparatory work including provision of visiting the Government Survey Department for procurement of necessary and relevent information & application for survey permit from Marine Department and/or other authority ii) Mobilisation & Demobilisation of survey team, equipment and USV to site LS RM 30,500 iii) Tide gauge installation at the vicinity of the survey area and will be left during the survey 2 Field Data Collection and Surveying i) Bathymetry survey by using Single Beam Echo Sounder (SBES) with main sounding LS RM 20,600 profile of 25m line interval 3 Data Processing and Reporting i) SBES bathymetry survey: Data processing and reduction LS RM 19,000 ii) Issue a survey report the latest 14 days after demobilize LS RM 2,500	Option B) SBES by	using a USV			
procurement of necessary and relevent information & application for survey permit from Marine Department and/or other authority ii) Mobilisation & Demobilisation of survey team, equipment and USV to site LS RM 30,500 iii) Tide gauge installation at the vicinity of the survey area and will be left during the survey 2 Field Data Collection and Surveying i) Bathymetry survey by using Single Beam Echo Sounder (SBES) with main sounding profile of 25m line interval 3 Data Processing and Reporting i) SBES bathymetry survey: Data processing and reduction LS RM 19,000 ii) Issue a survey report the latest 14 days after demobilize LS RM 2,500	1 Pre Surve	ey Activities			
from Marine Department and/or other authority ii) Mobilisation & Demobilisation of survey team, equipment and USV to site LS RM 30,500 iii) Tide gauge installation at the vicinity of the survey area and will be left during the survey 2 Field Data Collection and Surveying i) Bathymetry survey by using Single Beam Echo Sounder (SBES) with main sounding profile of 25m line interval 3 Data Processing and Reporting i) SBES bathymetry survey: Data processing and reduction LS RM 19,000 ii) Issue a survey report the latest 14 days after demobilize LS RM 2,500	i) Preparat	ory work including provision of visiting the Government Survey Department for	-	- 1	ncl. below
ii) Mobilisation & Demobilisation of survey team, equipment and USV to site LS RM 30,500 iii) Tide gauge installation at the vicinity of the survey area and will be left during the survey 2 Field Data Collection and Surveying i) Bathymetry survey by using Single Beam Echo Sounder (SBES) with main sounding profile of 25m line interval 3 Data Processing and Reporting i) SBES bathymetry survey: Data processing and reduction ii) Issue a survey report the latest 14 days after demobilize LS RM 19,000 LS RM 2,500	procuren	nent of necessary and relevent information & application for survey permit			
iii) Tide gauge installation at the vicinity of the survey area and will be left during the survey 2 Field Data Collection and Surveying i) Bathymetry survey by using Single Beam Echo Sounder (SBES) with main sounding profile of 25m line interval 3 Data Processing and Reporting i) SBES bathymetry survey: Data processing and reduction ii) Issue a survey report the latest 14 days after demobilize LS RM 19,000 LS RM 20,600 LS RM 19,000 LS RM 2,500		·			
2 Field Data Collection and Surveying i) Bathymetry survey by using Single Beam Echo Sounder (SBES) with main sounding profile of 25m line interval 3 Data Processing and Reporting i) SBES bathymetry survey: Data processing and reduction LS RM 19,000 ii) Issue a survey report the latest 14 days after demobilize LS RM 2,500					
i) Bathymetry survey by using Single Beam Echo Sounder (SBES) with main sounding profile of 25m line interval 3 Data Processing and Reporting i) SBES bathymetry survey: Data processing and reduction ii) Issue a survey report the latest 14 days after demobilize LS RM 19,000 LS RM 2,500		ge installation at the vicinity of the survey area and will be left during the	LS	RM	4,500
profile of 25m line interval 3 Data Processing and Reporting i) SBES bathymetry survey: Data processing and reduction ii) Issue a survey report the latest 14 days after demobilize LS RM 19,000 LS RM 2,500	2 Field Dat	a Collection and Surveying			
3 Data Processing and Reporting i) SBES bathymetry survey: Data processing and reduction ii) Issue a survey report the latest 14 days after demobilize LS RM 19,000 LS RM 2,500	•		LS	RM	20,600
i) SBES bathymetry survey: Data processing and reduction LS RM 19,000 ii) Issue a survey report the latest 14 days after demobilize LS RM 2,500	profile of	25m line interval			
ii) Issue a survey report the latest 14 days after demobilize LS RM 2,500			1.0	50.4	10.000
Total - (Tax excluded) RM 77,100	ii) issue a st	nivey report the latest 14 days after demobilize	LS	KIVI	2,500
		Total - (Tax excluded)		RM	77,100

Payment Milestones

Milestone No.	Milestone	Remuneration %
1	Advance Payment – Mobilisation Fee	30
2	On completion of field work	40
3	Submission of Preliminary Report	20
4	On submission of Final Report	10

Note on payment: It is assumed that invoices to be settled within 30 days

Quotation Notes

- 1 If the survey areas are significantly different prior to the commencement of the survey then any increase or decrease in the quantity of survey work will be considered a Contract Variation.
- 2 All weather contingency included except named meteorological events
- 3 The datum that will be used for this survey will be determine upon contract award
- 4 The price is offered in Ringgit Malaysia (RM) and not including tax.
- 5 The above prices assume that the survey will be carried out in a logical and continuous sequence in accordance with the POW. Any break in the sequence of planned survey activity as a consequence of but not limited to; interference by fishing/military activities resulting in non-productive transits or delays in port, would be charged at the appropriate day rate.
- 6 This quotation assumes daylight hours operations.
- 7 Our quotation excludes compensation to fishermen and any EIA surveys.
- 8 Our offer excludes Liquidated Damages, Contract Bonds and Warranties.
- 9 Our Contract Liability in all events is subject to the maximum limit of the Contract Value and in no event will our liability exceed the contract Value.
- 10 Our quotation is valid for 90 days
